Student Evaluations for Social Statistics (Summer 2015)—*Instructor of Record*

Students ranked each statement on a scale from 1 (strongly disagree) to 5 (strongly agree). The "Dept. Ave" columns list the averages of all courses offered by the Sociology Department for the same semester.

Courses Instructed	Number of Responses	Number Enrolled	Overall, the instructor was an effective teacher.		I learned a great deal in this class.		Overall, this was a worthwhile course.		The course's goals and requirements were defined and adhered to by the instructor.		The Instructor was approachable and made himself/herself available to students outside the classroom.

Comments:

"The class was challenging but because of Sarah's dedication and willingness to help every student it was worth while."

"As a transfer student, I wanted to become acclimated to the University before fall semester began and so I enrolled in summer session. Sarah Mosseri was a phenomenal instructor. She went above and beyond to make herself available to her students."

"Sarah Mosseri is one of the greatest Human Beings I have ever had the pleasure to meet. She was a great professor, and was able to teach the full class at each student's individual pace (something that is hard to find now a days). She was very engaging, and was also able to make a class such as Sociology of Statistics more interesting and relevant by adding examples from our daily routines. I took this class last semester and had to withdraw for the professor was all over the place and would talk all class and leave the students in the dust. However, Sarah made me realize that this class was not as scary as I thought if I could just get behind the theories that propelled this class. Super Great Professor! 11/10 would take again"

"Tied for the best summer session class I've ever had! Thanks a bunch, never thought I'd have so much fun doing statistics. If there was a Nobel peace prize for math you'd deserve it. Thanks again"
